

What if your company data could transform into near real-time, intelligent reports and dashboards powered by human interaction?

The background features a series of dark grey, flowing, wavy lines that create a sense of movement and depth. The lines are most dense on the left side and become more sparse towards the right. The overall aesthetic is modern and tech-oriented.

Smart Business Insights

A revolution in business reporting with controlled, AI-driven, human, data interaction

*“In a world that’s digitalizing at lightning speed, it’s all about **connections**, linking things, data, people, and processes seamlessly. API Management, Integration, and iPaaS are the heart and lungs of this global digital journey.”*

- Ruben van der Zwan, Founder

*“In a world that’s digitalizing at lightning speed, it’s all about **data** and how you turn your data into the most valuable asset of your company to make smart, near real-time decision based on human data interaction.”*

- Ruben van der Zwan, Founder

We only need to solve two things

**How to keep
your data safe?**

01

**How to limit
access to users?**

02

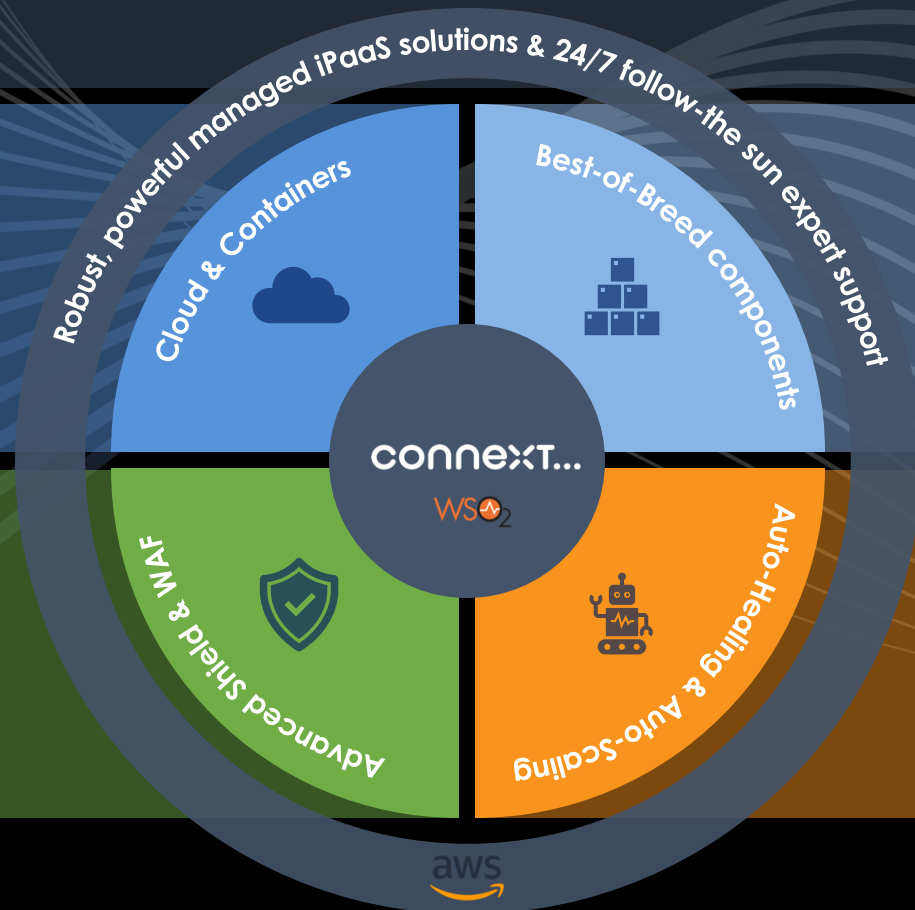

Seamlessly *connected* with ConnexT Platform

Extreme Scalable

Due to our pure, native cloud & container approach, the platform can scale fast horizontal and vertical if needed. The platform automatically scale-up during (expected) peak loads, and automatically scale-down to the base line when possible.

Extreme Secure

With zero-trust approach in mind, all technical components (networking, storage) are bi-directional encrypted. Next to encryption all secrets are protected by secure vaults and passwords are generated on the fly.

Extreme Flexible

Due to our pure container approach, we can extend the platform with other (then WSO2) technology, databases, serverless services and so fort. This enables your organization to rely on a best-of-breed software approach while all components are still automated, monitored and managed under the same SLA and policies.

Extreme Reliable

With strict immutable deployments of artefacts and strict security policies enforced (advanced shield and WAF), combined with auto-healing and auto-scaling capabilities, the platform is reliable in terms of uptime, performance and protection.

How it is done

STORE

We safely store your data in a Private Digital Vault, fully GDPR, SOC2 and BIO complaint

02

ANALYZE

Your data is enriched with publicly available information and analyzed by advanced LLM'S

03

INTERACT

You can interact with your data by request/response model in ChatGPT, MS Teams or ConnexT Portal

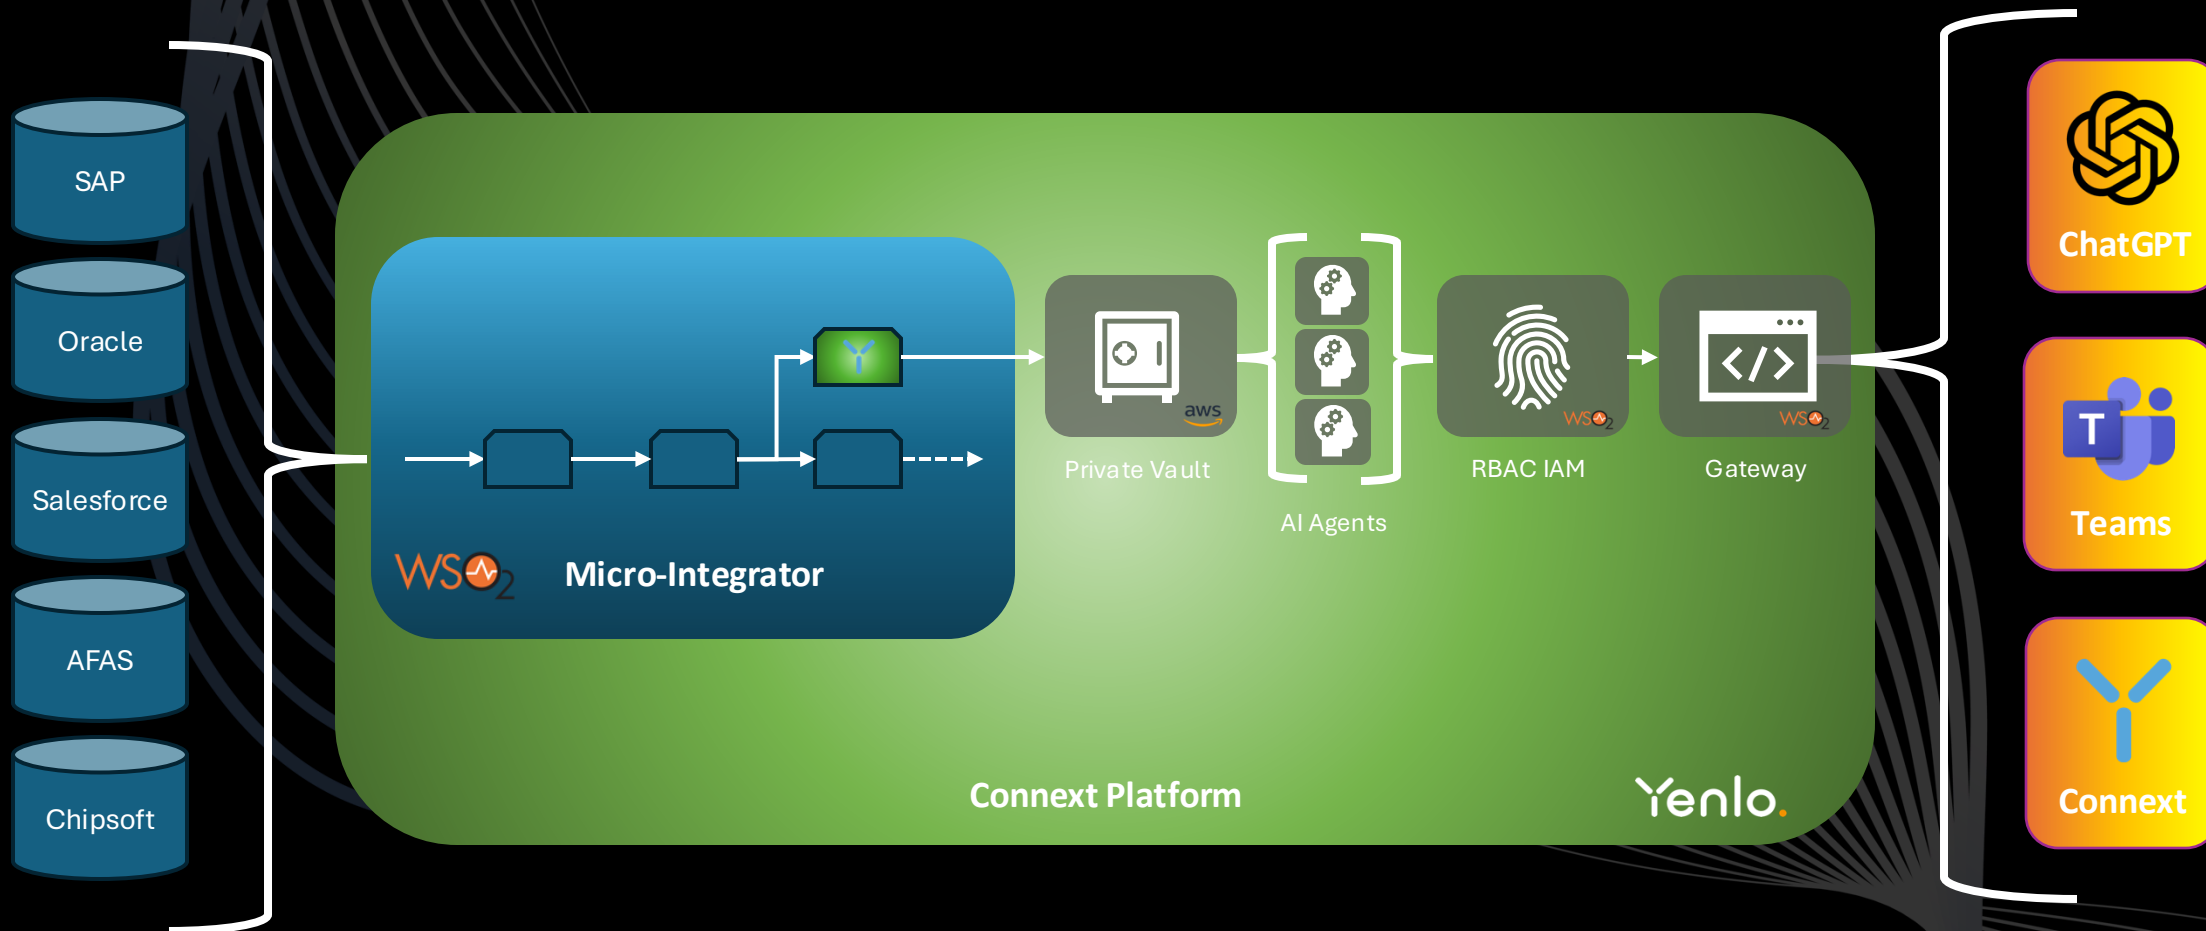

04

01

CAPTURE

We capture your data with our smart AI-plugins for WSO2 or Boomi based iPaaS platform / ConnexT Platform

CONNEXT PLATFORM

Managed iPaaS platform for WSO2 and Boomi

CONNEXT GO

Managed Integrations for Appl-2-Appl data exchange

API, Integration & IAM experts

Expert services for implementation, configuration and development of API's, Integrations and Identity Management with WSO2, Boomi and Azure technology

24/7 Operational Support

24/7 Operational Support team from Asia, Europe and USA for WSO2, Boomi and Azure stacks

Software Licenses

Optimization and re-sell of WSO2 and Boomi licenses
